Let's Start!

Are you a collector?

Learning Outcome

Describe routines and regular activities in a wider range of social and work contexts.

Ask your partner:

- What collection do you have?
- How do you get more items into your collection?
- What else have you considered collecting?

Can Do Statements

- I can talk about hobbies.
- I can talk about people's habits.
- I can talk about how something happens or how someone behaves.

Let's Explore!

In this article, Sally talks about the **price*** of stamps.

* Another way to say the "price" of something is the *value*.

Instructions: Read the text aloud.

Why is it that some stamps are sometimes worth a few cents while others are worth up to a million dollars to a collector? The price of the stamp depends directly on two factors: demand and condition. A stamp is usually valuable if it exists in a limited supply and there is a large demand for it. In terms of condition, there are three types of stamp categories: mint, unused, and used.

Mint condition means that the stamp has the original glue on its back. Unused stamps may have some glue missing, but they have never been sent. Used stamps are the most common and plentiful. They are often stamps that have a cancellation mark because they have been mailed on a letter.

There are other factors that also affect the value of a stamp, such as the type of glue and the way the design is centered. So don't throw out those old stamps before you look carefully at them!

Let's Practice!

Do you want to try stamp collecting?

Instructions: Circle all the adverbs of frequency.

Stamp collecting is always an interesting hobby. Collecting is always an interesting hobby. Sometimes, stamps are worth only a few cents. Rarely, stamps are worth up to a million dollars. Used stamps often have a cancellation mark because they have been mailed on a letter.

Let's Practice!

Sally talks about the factors that affect the price of stamps.

Instructions: Proofread the sentence. Cross out the incorrect word. Write the correct word above to complete the sentence. Then read the sentences aloud. Check your pronunciation with your instructor.

1. The price of the stamp depends direct on two factors: demand and condition.
2. Obvious, mint stamps are the most valuable.
3. Don't throw out those old stamps before you look careful at it!

Extension Activity

Find interesting facts about other types of collections.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Think of things other than stamps that people collect.
- Do research on 2 different collections. Read articles or watch videos online.
- Complete the table with the information you found.
- Present your results to a partner.

Self-Assessment

Yes

No

I research 2 different collections.

☐
☐

I complete the table.

☐
☐

I present the results of the research.

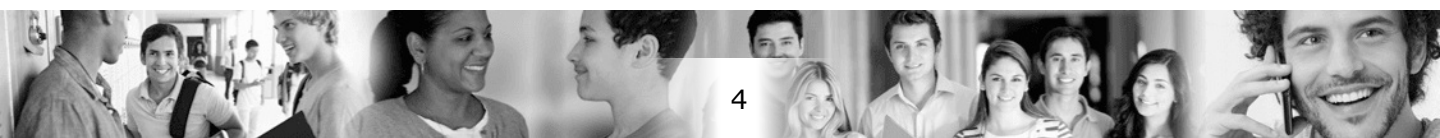

☐
☐

Collection:	What is the price range for items?	What affects the price?	How do you contact the collectors?	Where do they get the items?

Target Words

- factor** (noun): reason; explanation
e.g. The price of the stamp is based on two factors.
- to depend** (verb): to change according to something else
e.g. The value of a stamp depends on supply and demand.
- supply** (noun): how much of a product or service is available
e.g. A stamp is usually valuable if it exists in limited supply.
- demand** (noun): how many people want to obtain a product or service
e.g. A stamp is also valuable if there is a large demand for it.
- category** (noun): a group of objects or parts that are divided according to what they have in common
e.g. There are three types of stamp categories: mint, unused, and used.
- glue** (noun): adhesive product used to stick one thing to another
e.g. Other factors also affect the value of a stamp, such as the type of glue.
- collector** (noun): a person who likes to collect an item
e.g. Some stamps are sometimes worth up to a million dollars to a collector.

Learning Points

Adverbs of Frequency

Adverbs of frequency (always, usually, never, etc.) say how often something happens.

Sometimes the adverb specifies the exact frequency of the action, like *yearly* or *daily*. These are called definite adverbs of frequency.

Indefinite adverbs of frequency are usually placed before the verb.

e.g. *I often walk home from work.*

With verb tenses that have two parts, or when an auxiliary is used, the adverb is placed between the auxiliary and the main verb.

e.g. *I can rarely eat chocolate.*

Definite adverbs of frequency are usually placed after the main verb or direct object if there is one.

e.g. *We go to the stamp convention yearly.*

Adverb	How Often?
always	100%
often	80%
usually	60%
rarely	10%
never	0%
daily	once a day
weekly	once a week
biweekly	once every two weeks
monthly	once a month
yearly	once a year

Examples:

- *Why is it that some stamps are sometimes worth a few cents while others are worth up to a million dollars?*
- *Used stamps often have a cancellation mark because they have been mailed on a letter.*

Learning Points

Adverbs of Manner

You use adverbs of manner to describe how something is done.

Example:

You look carefully at them!

How do you look? Carefully.

Many adverbs are formed by adding *-ly* to an adjective. When the adjective ends in **y**, you take out the letter and add *-ily*.

Example:

slow – slowly

happy – happily

The adjectives *fast*, *hard*, *well* and *straight* are exceptions. They do not change when they become adverbs.

Some adverbs, like *basically* or *generally*, are often placed at the beginning of the sentence.

Adjective	Adverb
direct	directly
obvious	obviously
enthusiastic	enthusiastically
definite	definitely
competitive	competitively

Not all the words that end in **ly** are adverb.

For example:

Supply, is a verb and also a noun.

Holy, is an adjective.

Friendly and lovely are adjectives, too.

Dragonfly, is a noun. Apply, is a verb.

Examples:

- *The price of the stamp depends directly on two factors: demand and condition.*
- *Obviously, mint stamps are the most valuable.*
